### Pro cable stripping knife set

The universal "P" ring jaw design offers high hand protection at work as well as protects the edge. As a pad while cutting, the cable can ensure a precise and sharp cut. Universal design of the plank at the tip of the "P" ring jaw, offers a high protection for the insulation of cable during the fast pushing-stripping movement. Ergonomics and streamlined design ensure that the knife can be handled with one hand without slipping away by inserting the middle finger into the "P" ring. Outstanding cover with a lock design is suitable for either right-or left-hand user.
