### Pro cable stripping knife set

Universal "P" ring jaw design offers great hand protection, and protects the knife edge. As a pad while cutting, ensure a precise and sharp cut. Depending on the cutting depth, the universal design of the draw-back guide pad at the tip of the "P" ring jaw can be drawn back automatically during the dragging-stripping movement to achieve a precise and efficient result. Also work as a guide for a straight cut. Ergonomics and streamlined design ensure the knife can be handled with one hand without slipping away by inserting the middle finger into the "P" ring. Outstanding cover with a lock design is suitable for either right- or left-hand user.
